

DELIVERING WORLD-CLASS BPA TRAINING IN PARTNERSHIP

## **ADVANCED BPA / DATE TBC**

40 HOUR COURSE / READING, UK

This week-long training course delivers theoretical and practical instruction in **ADVANCED BPA** and focusses on the application of BPA at crime scenes. The course is structured to allow participants, who have previously attended Level 2 BPA Training (or a documented equivalent), to improve their skills and knowledge and attain competency in the independent analysis of bloodstain patterns at crime scenes and provide subsequent testimony as an expert witness. It is suitable for Forensic Scientists, Law Enforcement Personnel, Crime Scene Investigators, Laboratory Practitioners and other individuals aligned with BPA in the laboratory or at crimes scenes as part of their ongoing professional development in BPA. It includes a session on gunshot-generated spatter, which is unique in the UK.

**Instructors:** Jo Millington & Gillian Leak

## BASIC (LEVEL 2) BPA / 13-17 SEPTEMBER 2021 40 HOUR COURSE / READING, UK

This week-long training course focusses on the BASIC APPLICATION OF BPA and is suitable for Forensic Scientists, Law Enforcement Personnel, Crime Scene Investigators, Laboratory Practitioners and other individuals aligned with BPA in the laboratory or at crimes scenes. The course uses classroom-based and practical (wet-blood) sessions, including simulated-assault scenarios, to provide participants with a knowledge base that will underpin the robust assessment of bloodstain patterns at crime scenes and on items examined in the laboratory. It meets the educational standards as defined by the IABPA and successful participants are able to apply for industry-standard professional membership. **Instructors:** Jo Millington & Gillian Leak

## RECENT PARTICIPANT FEEDBACK

"Professional training at its best - all relevant to my job" [CSI]

"Great to have such a varied group: CSIs, FSPs, students, bringing all our experiences together"
